SUMMARY

Result-oriented BTech Information Technology graduate **(9.15 CGPA)** with hands-on experience in **full-stack web development**, REST-based application design, object-oriented programming, and scalable systems using **ReactJS**, **Java**, **PHP**, and **MySQL**. Trained at **Persistent Systems** in **Core Java**, **DSA**, **Linux**, **DBMS**, and foundational microservices, with proven impact through **API-driven** projects like AlphaAgro and an Invoice Management System while actively leveraging **AI tools** for debugging and development productivity.

EDUCATION

B. Tech (IT) – 76.98% Walchand Institute of Technology, Solapur — Sept 2020 – Jun 2024

HSC – 64.15% | DSM College, Parbhani — Jun 2019 – Mar 2020

SSC – 85.80% | Netaji Subhash Vidyalaya, Manwath — Jun 2017 – Mar 2018

EXPERIENCE

Persistent Systems – Martian Summer Internship Program — Jun 2023 – Aug 2023

- Completed a structured engineering training program covering **Core Java**, **DSA**, **Linux** command-line operations, **DBMS**, and foundational **DevOps** and **CI/CD concepts** used in modern software development, resulting in an **85%** increase in participant knowledge acquisition.
- Demonstrated excellence in the training program, showcasing a robust understanding of Linux, DBMS, Core Java, and **DSA**, affirming dedication to continual learning and professional development with a **78%** performance improvement.
- Gained exposure to scalable application design, service-based architectures, and **software development life cycle** practices aligned with industry standards.

PROJECTS

AlphaAgro –

- Constructed a web application using **PHP** and **MySQL** for trading farming machinery, generating an **80%** increase in equipment accessibility for rural users.
- Architected and optimized relational database schemas to support scalable data access, high availability, and efficient handling of concurrent user requests and increased management performance by **86%**.
- Designed a responsive interface with **HTML**, **CSS**, and **JavaScript**, ensuring cross-device compatibility and yielding a **90%** improvement in navigation speed.

Invoice Management System –

- Developed a backend-driven Invoice Management System using **PHP**, **SQL**, and **RESTful APIs**, showcasing proficiency in full-stack development and service-based application design.
- Implemented a secure SQL database resulting in a **93%** improvement in data retrieval efficiency within the Invoice Management System.
- Presented precision in front-end technologies, achieving an intuitive and user-friendly system for seamless navigation, contributing to a user satisfaction increase of **98%**.

Portfolio Website –

- Applied **ReactJS**, **Tailwind CSS**, and Framer Motion to develop a responsive portfolio website, ensuring optimal display across multiple devices and contributing to **95%** user engagement.
- Displayed expertise in modern **front-end development** by implementing reusable React components and Tailwind CSS utility-based styling to create a structured, visually appealing, and maintainable interface, fostering a **91%** improvement in user engagement.
- Created specialized section within the portfolio website, leading to **90%** increase in employer interest through a comprehensive overview of technical skills and proficiency in relevant tools.

SKILLS

Programming Languages: - Python, Java, SQL, PHP, Web Development (HTML, CSS, JavaScript, ReactJS)

Concepts & Database :- MySQL, DBMS, JDBC, OOPS, DOM, JSON, Data Analysis, Debugging, **REST APIs**, Microservices Architecture (Foundational), **Software Development Life Cycle**.

Tools & Platforms :- GitHub (Version Control), Eclipse IDE, VS Code, Linux, Docker (Basics), **AWS**, **CI/CD** Awareness, **AI-assisted development tools** (ChatGPT, GitHub Copilot)

Soft Skills :- Verbal and Written Communication, Problem-Solving, Team Collaboration.

CERTIFICATIONS

- Java Programming Fundamentals by Infosys springboard.
- Data Analytics and Visualization Virtual Experience by Accenture on Forage.
